

## **Software Identification of the COM20020 Rev B, Rev C and Rev D**

**By Rich Wahler**

In order to properly write software to work with the COM20020 Rev B, C and D it is necessary to be able to identify the different revisions of the part. This is accomplished by interrogating register 5 as described below.

To identify the COM20020 Revision follow the following procedure:

1. Write 0xFF to Register 5
  2. Read Register 5
- If the value read from Register 5 is 0xFF then the part is a COM20020 Rev B or earlier
  - If the value read from Register 5 is 0x0F then the part is a COM20020 Rev C
  - If the value read from Register 5 is 0x8F then the part is a COM20020 Rev D
